PROFILE

Enthusiastic and motivated Junior Frontend Developer with a solid foundation in HTML, CSS, JavaScript, and React. Passionate about building clean, responsive, and user-friendly interfaces that enhance user experience. Skilled in modern tools such as Vite, Yarn, and Git, with basic knowledge of TypeScript.

Eager to apply my knowledge to real-world projects, contribute to a collaborative development team, and continuously improve my coding skills. Highly motivated to learn from experienced developers, stay updated with the latest web technologies, and grow into a professional software engineer.

EXPERIENCE

Junior Frontend Developer (Freelance)

Small Construction Company – "Adore memarliq"

Independently designed and developed a single-page website from scratch, taking full responsibility for the project from planning to deployment.

Used HTML, CSS, and JavaScript to implement all features, layouts, and styles without any external templates or frameworks.

Created a responsive and mobile-friendly layout, ensuring that the website works seamlessly across desktops, tablets, and mobile devices.

Developed a clear site structure and intuitive navigation, making it easy for users to explore the company's services.

Worked closely with the client to gather requirements, understand business goals, and translate them into a functional and visually appealing website.

Suggested design and functionality improvements based on feedback, iterating multiple times to ensure the final product met client expectations.

Implemented interactive elements and smooth user experience features to enhance engagement and usability.

Gained hands-on experience in project planning, coding, debugging, testing, and deploying a live website for a real client.

Learned to manage time effectively and solve problems independently, improving both technical and soft skills.

The website can be accessed at: <https://adorememarliq.github.io/>
